

### Profile

I have a bachelor's degree in software engineering. Energetic, practical professional with 4+ years of experience QA Analyst in manual and automated testing. I have a strong knowledge of all stages of software development and strong knowledge of testing methodologies, tools, and processes. Seeking a challenging position in a dynamic organization where I can contribute to delivering high-quality software solutions. Experienced in SQL and API (Postman).

### Main Skills

- ✓ Manual and automated testing of websites and APIs
- ✓ a dedication to using quality standards and producing high-quality software
- ✓ intrinsic drive and a proactive attitude toward assisting others
- ✓ a working knowledge of testing ideas and procedures
- ✓ Ability to address complex challenges through critical and inquisitive thought
- ✓ Ability to extensively test features and apps with great attention to detail Capability to work alone or with others to solve problems
- ✓ strong communication abilities in both writing and speaking, including active listening

### TECHNICAL SKILLS:

- ✓ Operating Systems: Windows, MAC OS
- ✓ API: Postman, Swagger
- ✓ Bug Tracking: Jira, Help
- ✓ CI servers: Jenkins, GIT
- ✓ Programing language: C#, Java, React.js
- ✓ Web Related: HTML, CSS, JavaScript
- ✓ Web Testing Tools: XPath, Developer Toolbar, Android studio, Selenium
- ✓ Mobile: Android, iOS
- ✓ Databases: MySQL, MongoDB

### Professional Experiences

#### Quality Assurance Analyst

Sep 2020 – Mar 2023

#### Manage Petro

North Vancouver, BC

- Collaborate with the development team and the rest of the QA team to improve software quality
- Design testing plans and strategies for UI, API, load, performance, integration, and regression testing for our different products – web and client/server.

**Nahid Jahani**

(604)441-9287 [jahaninahide@gmail.com](mailto:jahaninahide@gmail.com)

- Oversee all aspects of quality assurance including establishing metrics, applying industry best practices, and developing new tools and processes to ensure quality goals are met
- Analyze, recommend, and configure tools to be used for quality assurance
- Writing and maintaining automated test suites for front-end and back-end components using JMeter, Test Complete, Selenium, SQL, Java, JS, Git, Linux, or Windows Batch file.
- Installing and configuring test environments
- Develop and maintain existing scripts to refresh testing environments
- Collect metrics to measure the quality of our products over time

**Web Developer**

**Feb 2019 – Aug 2020**

**Faith Fire**

**Surrey, BC**

- Participated in code reviews, design reviews, and coding with a lot of innovation
- Proficient in web technologies: HTML, CSS, client-server architecture, API
- Shared insights with the team and found tailored solutions for every problem
- Assist in resolving any defect escalations and locating ongoing quality control problems.

**Certifications**
